Extra Credit Exercises

SHRiMP Mapping Program

- Find, install and use the SHRiMP mapping program to map any of the datasets previously used or your own data

- CAUTION: SHRiMP is much, much slower then the previous ones.

wgsim

Generate your own test data and test how different settings affect mapping

You can find a copy of wgsim here:

`https://github.com/lh3/wgsim/archive/master.zip`

Read the README and follow the Compliation instructions. Then read the rest of the README and the help screen for the program. Is is pretty simple but fairly quick.
